Absolute Evokit is a frameless self-contained pocket door kit for drywall applications that thanks to its practical snap-together construction is quick and easy to assemble and install.

Made with galvanized steel bars and an aluminum frame, the system can be assembled on any flat surface. It has a quick assembly, minimal labour times and produces a finished product that is built to last.

Absolute Evokit offers a perfect space saving solution and finished design feature that does not require jambs, frames or trim around the door. Its packaging allows for quick and easy transportation in the field.

The Evokit is compatible with both wood and glass doors and can sustain weights of up to 265lbs.
