Evokit is a framed self-contained pocket door kit system for drywall applications. The system is suitable for 3 1/2" - 3 5/8" to 5 1/2" studs and can accommodate 1/2" and 5/8" drywall application. Thanks to its practical snap-together construction it is quick and easy to assemble and install.

Made from galvanized steel, the system can be assembled on any flat surface. It has a quick assembly, minimal labour times and produces a finished product that is built to last.

Evokit is the perfect space saving solution and its packaging allows for quick and easy transportation in the field.

The Evokit is compatible with both wood and glass doors and can sustain weights of up to 265lbs.

Its sturdiness allows us to achieve widths of up to 48" and heights of 120"
